U.S. DEPARTMENT OF AGRICULTURE

CCC ISSUES MONTHLY SALES LIST FOR OCTOBER 1974:

WASHINGTON, Sept. 30--The U.S. Department of Agriculture announced today the minimum prices at which Commodity Credit Corporation (CCC) commodity holdings are available for sale beginning at 2:30 p.m. (EDT) September 30, 1974. These prices, subject to amendment, will continue until superseded by the November Monthly Sales List.

The list of commodities available for sale is unchanged from a month earlier except for the deletion of rice. Wheat, corn, rye, barley, and sorghum stocks have been sold except for small reserves to cover tolerances on undelivered sales etc., and are listed for occasional sales that may be necessary as deliveries are being completed.

With the 1974 crop marketing year beginning October 1, formula pricing for corn and sorghum is based on 1974 loan rates plus markups representing 15 percent of national average loan rates plus carrying charges. Carrying charges are unchanged at 2 cents per bushel per month for corn and 3½ cents per hundredweight for sorghum. Formula prices will be the same for the first four months and then increase by the amount of the carrying charge during the fifth through the tenth month of the marketing year.

In this sales list: "Unrestricted use" applies to sales which permit either domestic or export use and "export" applies to sales, which require export. "Market price" and "transit value" apply to prices and values as determined by CCC. "Designated terminals" are listed in grain price support regulations. A listing of USDA offices involved in CCC sales operations is shown at the end of the list.

Prices on deferred delivery sales of grain at origin locations will be in accordance with the CCC Monthly Sales List in effect at the time of sale with interest beginning for the account of the buyer the day after the date of sale. Such sales made on an in-store delivery basis will require storage to begin for the account of the buyer 10 days after the date of sale. Such sales made on an FOB origin basis will require storage for the account of the buyer beginning on the day after the date of sale. Storage charges will be in accordance with the 1974 Uniform Grain Storage Agreement schedule of rates. Interest to date of payment will be at 12 1/2 percent. No cash advance will be required from responsible buyers, but buyers will be required to furnish CCC an irrevocable letter of credit covering the purchase price plus estimated storage and interest to the end of the delivery period. Specific terms for to-arrive sales will be enumerated with separate announcements.

Applicants for all Department programs will be given equal consideration without regard to race, color, sex, creed or national origin.

Corn, oats, barley, grain sorghum, wheat, and rye, as determined by CCC will be sold at the market price for unrestricted use for "Dealers' Certificates" issued under the Emergency Livestock Feed Program.

Odd lots and off-quality lots are sold promptly and may not appear in the Monthly Sales List. CCC may limit sales quantities.

CCC reserves the right to refuse to consider an offer if it does not have adequate information of financial responsibility of the offerer to meet contract obligations of the type contemplated in this announcement. Interest at 12½ percent will be charged for delinquent payments on consignment and track grain sales from the date of sale to the date payment is received.

Although a commodity may not be specifically listed for export sale, CCC reserves the right to make emergency sales of its stocks for export if unexpected trade opportunities develop or when the flow of commodities to ports is disrupted or impeded and the maintenance of U. S. exports is temporarily jeopardized. Specific offering terms, including the applicable export announcement to be used, will be provided interested parties through special sales announcements and by amendments to the CCC Monthly Sales List.

On sales for which the buyer is required to submit to CCC proof of exportation, the buyer shall be regularly engaged in the business of buying or selling commodities and for this purposes shall maintain a bona fide business office in the United States, its territories or possessions and have a person, principal, or resident agent upon whom service or judicial process may be had.

Buyers are responsible for obtaining any required U. S. Government export permit or license. Purchase from CCC shall not constitute any assurance that any permit or license will be granted by the issuing authority.

Exports to certain countries are regulated by the U. S. Department of Commerce. These restrictions also apply to any commodities purchased from the Commodity Credit Corporation whether sold for restricted or unrestricted use. Countries and commodities are specifically listed in the U. S. Department of Commerce Export Control Regulations. Additional information is available from the Bureau of International Commerce or from the field offices of the Department of Commerce.

Stocks of tobacco under CCC loan are available for existing barter contracts.

To be placed on the mailing list for the Monthly Sales List, make request to: Director, Commodity Operations Division, ASCS, USDA, Washington, D. C. 20250.
